

Story Research Worksheet

Have a think about what species you could focus on for your entry. What do you see regularly? Showing everyday nature in a new perspective is a great approach! Correctly identify the species, including its Latin name. For inspiration, you can research the species' ecology, behaviour, role in the ecosystem, and relationship with humans. Consider them carefully, who are they, why do we care about them? What do you want to show off about them?

Common Name:

Latin name:

Sketch:

Where do they live (habitat)?

.....
.....
.....

What is their ecology - diet, behaviours, interactions?

.....
.....
.....
.....

What is special about them that you could show?
